

AKHIL K

DevOps Engineer | Cloud Infrastructure | CI/CD Automation

Palakkad, Kerala, India | +91 7902805502 | akhilkaladharan25@gmail.com | [akhil-kaladharan](https://www.linkedin.com/in/akhil-kaladharan) | github.com/akhilkaladharan

Professional Summary

DevOps Engineer with internship experience in Linux administration, AWS cloud services, infrastructure automation, container orchestration, and Continuous Integration and Continuous Deployment. Hands on experience with Docker, Kubernetes, Jenkins, Terraform, Ansible, Git, Prometheus, and Grafana. Skilled in deploying containerized applications, automating infrastructure provisioning, monitoring system performance, and managing cloud environments. Strong understanding of Infrastructure as Code, cloud architecture, system administration, and modern DevOps practices.

Core Skills

- DevOps Engineering
- Linux Administration
- Amazon Web Services
- Kubernetes
- Docker
- Jenkins
- Infrastructure as Code
- Terraform
- Ansible
- Bash Scripting
- Git and GitHub
- Cloud Infrastructure
- Continuous Integration
- Continuous Deployment
- Monitoring and Logging
- System Administration
- Container Orchestration
- Networking
- Application Deployment
- Infrastructure Automation

Technical Skills

- AWS EC2, VPC, IAM
- AWS S3, EKS, ECR
- Linux Operating Systems
- Docker & Docker Compose
- Kubernetes
- Terraform & Ansible
- Jenkins CI/CD
- Prometheus, Grafana, Node Exporter
- TCP/IP, DNS, DHCP, SSH, HTTPS

Professional Experience

DevOps Engineering Intern

July 2025 – March 2026

Synnefo Solutions, Kochi

- Managed Linux systems including user management, file permissions, process monitoring, troubleshooting, and network configuration to maintain stable system operations.
- Configured AWS services including EC2, IAM, VPC, and security groups to support cloud infrastructure deployments.
- Automated infrastructure provisioning using Terraform and configuration management using Ansible.
- Deployed containerized applications using Docker and Kubernetes to improve deployment consistency and application scalability.
- Built Continuous Integration and Continuous Deployment pipelines using Jenkins for automated application delivery.
- Automated routine administrative tasks using Bash scripting.
- Monitored infrastructure health and system performance using Prometheus, Grafana, and Node Exporter.
- Managed source code repositories using Git and GitHub.

Projects

Dockerized Web Application Deployment on AWS

GitHub: [DOCKER-PROJECT1](#)

Docker, AWS EC2, Nginx, Git, Linux

- Deployed a containerized web application on AWS EC2 using Docker and Nginx.
- Configured Linux based deployment for consistent application delivery.

CI/CD Automation for Containerized Web Application

GitHub: [WEBAPP-PROJECT2](#)

Jenkins, Docker, Kubernetes, Docker Hub, CI/CD

- Built and deployed a Node.js application using Jenkins, Docker, and Kubernetes.
- Reduced manual deployment effort by 70 percent through deployment automation.

CI/CD Pipeline for Node.js Application

GitHub: [NODEPIPELINE-P3](#)

Jenkins, Docker, Kubernetes, AWS EKS, AWS ECR, Git, Prometheus, Grafana

- Built an automated deployment pipeline using Jenkins.
- Containerized and deployed a Node.js application on AWS EKS using Kubernetes.
- Implemented monitoring with Prometheus and Grafana.

Microservices Architecture on AWS

GitHub: [CICD-PIPELINE-PROJECT4](#)

Terraform, AWS EKS, Kubernetes, Jenkins, Docker, Prometheus, Grafana

- Designed and deployed a scalable microservices application on AWS EKS.
- Automated infrastructure provisioning using Terraform.
- Improved deployment scalability and infrastructure automation by 60 percent.

Education

Certified DevOps Engineering

2025 – 2026

Synnefo Solutions, Kochi

Bachelor of Computer Science

2022 – 2025

College of Applied Science, Vadakkencherry

First Class

Certifications

- Certified DevOps Engineering Training and Internship, Synnefo Solutions
- NACTET Certified

Achievements

- Automated deployment processes that reduced manual deployment effort by 70 percent.
- Improved infrastructure automation and deployment scalability by 60 percent through Terraform and Kubernetes implementation.

Languages

English, Malayalam, Tamil
